POINT

Training Program

CASP+ is the only hands-on, performance-based certification for practitioners — not managers — at the advanced skill level of cybersecurity. While cybersecurity managers help identify what cybersecurity policies and frameworks could be implemented, CASP+ certified professionals figure out how to implement solutions within those policies and frameworks.

POTENTIAL JOBS:

- Security Architect
- Application Security Engineer
- Technical Lead Analyst
- Security Engineer

The CASP+ certification validates advanced-level competency in risk management, enterprise security operations and architecture, research and collaboration, and integration of enterprise security. The CASP+ exam covers the following:

- Enterprise security domain expanded to include operations and architecture concepts, techniques and requirements
- More emphasis on analyzing risk through interpreting trend data and anticipating cyberdefense needs to meet business goals
- Expanding security control topics to include mobile and small-form factor devices, as well as software vulnerability
- Broader coverage of integrating cloud and virtualization technologies into a secure enterprise architecture
- Inclusion of implementing cryptographic techniques, such as blockchain, cryptocurrency and mobile device encryption

CASP+ is compliant with ISO 17024 standards and approved by the US DoD to meet directive 8140/8570.01-M requirements. Regulators and government rely on ANSI accreditation, because it provides confidence and trust in the outputs of an accredited program.

PREREQUISITES

CompTIA recommends at least ten years of experience in IT administration, with at least five of those years including hands-on technical security experience.

Learning Objectives

- Risk management
- Enterprise security architecture
- Enterprise security operations
- Technical integration of enterprise security
- Research, development and collaboration

Course Schedule

SESSION 1:

- Risk Management
- Enterprise Security Architecture

SESSION 2:

- Enterprise Security Operations

SESSION 3:

- Technical Integration of Enterprise Security

SESSION 4:

- Research, Development and Collaboration
- Review Questions and Exam Simulation

COURSE FEATURES

- Live instructor-led training in modern classrooms
- A thorough review of CASP+ topics by industry experts
- 24 x 7 access to the real labs in classrooms and remotely
- 100% latest material & unlimited live hands-on labs & 600+ practice questions
- Confidence building hands-on training
- Study material, notes, videos, lab book, and practice questions included in course price
